THE NEWS OF STONY PLAIN AND DISTRICT.

Mr. "Ken" Smith, the popular young bank clerk, is at present up at the Onoway branch of the Canadian Bank of Commerce, for a short stay.

The premises recently vacated by Baker Ph. Trapp will shortly, it is said, be re-opened as a confectionery shop, with a local charming young lady in charge.

Quite a few of his friends here have been receiving greeting cards, at this season, from Mr. James Christy. The former Councillor and his family are still in the Chilliwack (B. C.) district.

The Stony Plain orchestra has had a busy time lately, running three to four engagements a week, finishing up with the dance last night in Kelly's Hall.

Mr. William Comisarow, the Viking merchant, paid a short holiday visit with his parents in Stony.

Mrs. Ida Smith returned on Monday from a holiday trip to Kamloops, where she had been visiting relatives.

Mr. Gillespie spent the holiday season with his daughter at Buffalo, Alberta.

Notes of Sports.

Wabamun hockeyists played a return game here Sunday with the Stony Juniors. The game started at 1 p.m. to a small crowd of onlookers. All the visitors put up a good game, the result was never in doubt for the local team. The Gannon pair, "Bill and Pat," were much in evidence, and were well supported by other members of the team, including the newcomers, George Michael and Earl Leeder. The Miller triplets, George, Albert and Edward, were forward line No. 2 for the local team thru the game, and succeeded in scoring a few goals for the team. Goalie Albert Wudel didn't have much to do, and did it in fine style, allowing the Wabamun 1 (only) goal.

Altho the final score was rather lopsided, it does not indicate the good playing that was put on by players on each side.

Stony's players: G Michael, E Leeder, W Gannon, P Gannon, H Yensen, A Wudel; A, G and E Miller.

Referee, Alvin Willie Musical Director, H. V. Trapp The Juniors are arranging for a game at Wabamun.

Saturday Night Dances.

Local dancers and those who visit Stony Plain on Saturday evenings will be interested in learning that there will shortly be dancing on Saturday evening from 9 to 12 midnight. Arrangements are now under way by Mr. Wm Kelly, the proprietor of the hall, who is convinced that this will be a popular innovation. Good dance music is assured. Watch for posters announcing date of the first dance.

CHAPTER VIII.—Continued

There followed a silence until Cousin Columbine exclaimed: "Dear me! Here I am dwelling on the past like an old woman; when what I started out to tell you was why I wrote that idiotic letter. You see, my mother instilled into me the knowledge that we came of gentle people—finer people, perhaps, than some of our good neighbors. She was an orphan, with no near relatives of her own; but she was very proud of the Nance connection and always kept us up to certain standards. If we lived in a cabin with a dirt floor, at least, there were spotted curtains at the windows, and we ate of a white dish—a clean one too! I think her dream was to send me East for an education, and long as they lived she corresponded with Father's parents, something he might have neglected to do himself. Later she wrote down the names of the younger members of his family, among them, your Grandfather Nelson's, Father's half-brother, telling me that if I were left alone and needed help, I was to appeal to them."

"Did you ever have to?" queried Nancy.

The old lady shook her head.

"But I kept in touch with them, as Mother would have wished. Many have died, of course; for Father was so much older than his half-brothers that he was almost of another generation."

"It must seem strange never to have seen any of your own people," commented Jack.

"Not only strange," said Cousin Columbine, "but sad and in fact it was that sadness which caused me to make a resolution to see some one belonging to me—some one of my own blood, before I died."

"But why didn't you go East for a visit?" questioned the boy, forgetting the conversation he had had at this idea when, weeks before, Aunt Louise had read aloud the letter from their distant relative.

"Because," responded the astute old lady, "I was not sure of a welcome! I realized that I was nothing to my Eastern cousins but a bit of family history—a queer old woman, perhaps, who was born in a covered wagon, and whose life had been lived in a little Colorado town. Besides, I dreaded to be away from home, even temporarily. My roots go deep, like the roots of an old tree that has never been transplanted. I admit I toyed with the idea; but gave it up; and the next thing was to get some of you to come to me."

She paused, and Jack said, smiling: "But how did you happen to pick out Nancy?"

"I could hardly expect the older members of the family to drop their work and come at the whim of a cousin whom they had never seen, could I? Besides, I had a yearning for some one young. But I've read about these modern girls, Nancy, and was just a bit afraid. Suppose, I asked myself, suppose I get her out here and find she is one of those—those flappers?"

Both young people gave way to

laughter, the word sounded so strange on the old lady's lips.

"Do you see now?" asked Cousin Columbine, "why I wrote that letter?"

"You mean," said Jack with sudden inspiration, "that no flapper would have accepted your invitation?"

"That's it, exactly. No girl whose sole pursuit was pleasure and society would have been willing to put up with such a situation. But a girl like Nancy, would, I was sure, be glad to help out a poor old lonely cousin. So I made the job as unattractive as I could. It's true that Aurora doesn't do everything my way; and that often I'm desperate for some one to take a stitch for me, since I loathe the very sight of a needle, and always did. Oh, there was enough truth in that letter so it didn't lie very heavily on my conscience! And when I read it over I said to myself: 'Columbine Nelson, no but a good, sensible, old-fashioned girl would consider this proposition for a minute; and you don't want the other kind.' So I mailed the letter."

The room was silent for a moment. Nancy's cheeks flamed, not solely from her close proximity to an air-tight stove. What would Cousin Columbine think if she knew how impossible that proposition seemed to her—that nothing in the world save Dad's financial losses would have made her give it a second thought—that she wouldn't have considered it even if Jack hadn't thought out this scheme and put it through while she fought (or wanted to) to the last ditch. Nancy knew she was smiling, but she didn't know she was smiling. She even avoided meeting her brother's eyes as she responded: "I'm afraid you'll be awfully disappointed in me just the same."

"No," asserted Miss Columbine brightly: "I either like a person at first sight, or I don't like them. Then that way always. I'll admit you look rather ornamental; but that's nothing against you if there are brains in that pretty head of yours, and I don't doubt that, you being a Nelson. As for your brother, his brains were evident in the letter he sent me. Back in my father's day he would have been a pioneer."

Nance laughed.

"I can't see Jack driving a covered wagon, Cousin Columbine!"

"You don't have to in these days of automobiles. But he's got the spirit, and that's what counts, my dear."

Jack flushed now, not being as sure as Cousin Columbine that he possessed the courage of his forefathers.

"When do I go to work?" he questioned, in an effort to change the conversation.

The old lady hesitated, and then said: "Here's my second confession: When I sent that telegram I had a job for you on the McKenzie ranch over Divide way; but the next day Mr. Adams telephoned and said his nephew from Boulder wanted the place after all. Don't look distressed, Jack. You'll have a job before the week is up. I hoped the Adams would have something for you to do, but there are so many boys in the family they seldom hire outside help."

Jack was frowning a little. He said: "I must get something as soon as possible, Cousin Columbine. I don't want to sponge on you for board."

"Idiotically!" she retorted. "This is the first time I've had company in fifty years. But I've asked Mark Adams to be on the lookout, and he'll find something if anybody can. He's smart as a whip; and a good boy into the bargain. All the Adams boys are good. I've always said that if Eve Adams isn't much of a cook, she's a grand success as a mother. Four sons, and every one a credit to the name."

"Eve!" laughed Nancy. "How did she ever dare to marry a man named Adams?"

"Because," replied the old lady with a twinkle, "she's set her heart on doing just that thing—always said that when she found an Adam she was going to rope him. What she wanted was to find one with Adams for his first name; but when John Adams came along she snapped him up—at least, that's the way she puts it. Eve was a Denver girl. Her

father made considerable of a fortune in gold in 1878, and lost it as many other did just then. After years of hardship, so much money went to their heads. Eve's father bought stock in fraudulent companies, and when the boom collapsed—well, he collapsed with it; you might say."

"Were they left with nothing at all?"

"Practically, but Eve's uncle in the East had money, and gave the girl an education. She was in Boston for three years; and on her way home she met John Adams on the train. He was going to California for his health; but when he saw Eve he decided that his health wouldn't be much use to him in California, if she was in Colorado. You needn't grin, Jack. It was just like that—love at first sight. And when she found his name was Adams, that settled it."

"Did he get well?" asked Nancy.

"Mercy yes! As for the boys—you've seen two of 'em. They don't look like invalids."

"And there are two more?"

Cousin Columbine nodded.

"Luke's eighteen, and John will be."

"You don't mean," gasped Nancy, "that they're really named like that—Matthew, Mark, Luke and John?"

Jack rocked with mirth, and Cousin Columbine's eyes lighted.

"Indeed they are. Folks at Pine Ridge are used to 'em and never think about it; but I dare say it sounds queer to outsiders. That was Eve's doing. She's sort of fantastical and dreamy. But she's a wonderful woman and her husband works the ground she walks on. I wish I could have got you a job there, Jack. They're the people who Adams. Goodness gracious children! It's almost eleven o'clock! I haven't sat up so late since 1902 when the schoolhouse burned down and Aurora pounded on the door to wake me up on her way to the city. Breakfast at seven. We'd better be getting settled for the night."

It had, Nance admitted, as she smuggled down under the heavy patchwork quilt, been an interesting evening. After all, she wouldn't write that letter to her father—not yet, anyway.

CHAPTER IX.

More than two weeks slipped by with no sign of a job for Jack. This troubled the boy, though Cousin Columbine insisted that he more than earned his board by chopping firewood—new work to Jack, though when his sister consoled with him one afternoon, he declared he enjoyed it.

"But just the same, Nance," he added, lowering his voice that Aurora Tabbs, peeling potatoes at an open window, shouldn't hear, "I'm worried. I've got to earn some money; I've got to earn some money; body round here needs a ranch hand? Mark's been inquiring every where and hasn't got so much as a bite. Say!" (tearing off his sweater and tossing it upon the ground), "can you believe it's December first?"

Nance couldn't. There was a tang to the air, but the day seemed more like late fall than winter; and the sky was as blue as it is possible for a sky to be.

"I think," Nancy confessed as she perched precariously on the chopping block, "that this bright sunshine keeps us from being homesick. Since that first afternoon I've had

only a few twinges; though I rather dread the time when we're settled down and you away somewhere. Cousin Columbine says we ought to be seeing some of the points of interest around here. I'm going to climb that hill off to the north. Do you want to come?"

Jack glanced at the wood pile.

"Can't just now. You run along alone, Sis. Look here!" (as she started off), "haven't you got anything but those silk stockings?"

"That's exactly what I asked her this morning," Aurora's voice came through the open window. "Like as not that handsome pair of hose will be full of runs when you get back, Nancy Nelson. Why not borrow a pair of Miss Columbine's black cottons?"

Jack was obliged to hide a grin at a vision of his fastidious sister in cotton stockings; and Nance replied, almost impatiently: "Oh, see here, Aurora, didn't Juanita have on silk stockings at the post office this morning?"

"If she did, I'll paddle that girl when I get home," asserted the good woman. "Juanita Tabbs wears silk stockings in the mornin'! What's the world comin' to?"

"Mercy!" gasped Nance. "Have I got Juanita into trouble? I hope not. Next time we go down to the Springs, Aurora, I'll buy some woolen sport hose. I thought I packed a pair, but can't find them. Now don't worry any more on that subject. How do I reach that hill—the one with the pine trees on it?"

(To Be Continued)

THE RHYMING

OPTIMIST

By Aline Michaelis

AFTER LOVE

Love may come a little while
When care wanes, or strife;
Love may walk with you a mile
And an April hour beguile,
Only, in your life.

But forever and a day,
Echoing love's song,
After love has passed away,
After gods have turned to clay,
Memories will throng.

Memories of love's kiss, love's
glance,
These will wake anew,
With their aura of romance
Bringing back, through change and
Joy again to you!

Three hundred chicks have been hatched and successfully reared at Eura, France, from the Canadian Record of Performance stock imported in 1934. As a consequence, representatives from France are to visit Canada this year to make more purchases of Canadian R.O.P. stock.

When we can not find contentment in ourselves, it is useless to seek it elsewhere.

Little Helps For This Week

"Who is among you that feareth the Lord, that obeyeth the voice of His servant, that walketh in darkness and hath no light, let him trust in the name of the Lord and stay upon his God." Isaiah 50:10.

When we in darkness walk,
Nor feel the heavenly name,
Then is the time to trust our God,
And rest upon His name.

He has an especial tenderness for those who are in the dark and have no light, and His heart is glad when they say "I will go to my Father." For He sees thee through all the gloom through which thou cannot see Him. Say to Him, "I am Thy child. Forsake me not." Then fold the arms of faith and wait in quietness until the light goes on in the darkness. Think of something you should do, and go and do it, if it be but the sweeping of a room, the preparing of a meal, or a visit to a friend, heed not your feelings, but do your work.

Life Of Parliaments

Would Limit Length To Minimum Of Five Years

That five years should be the minimum effective life of parliaments in the empire was one of the suggestions made by Sir Arthur Weigall, chairman of the council, presiding over a luncheon tendered by the Royal Empire society to the delegates from empire parliaments meeting in London.

He also suggested civil servants in Britain and the Dominions should be interchangeable; and that both in Britain and the Dominions the governments should include a definite number of ministers without portfolio.

With a parliament of less than five years, said Sir Arthur, the ministry was standing in the stirrups and looking for an election rather than settling down in the saddle. (Australian and New Zealand parliaments are limited to three years.)

Root Action Extracts Moisture

One foot of the heavier type of Saskatchewan soil will hold the equivalent of two inches of rain. A long series of experiments at Swift Current experimental farm by Mr. Taggart, minister of agriculture, had shown that wheat roots would extract moisture from the soil to the depth of six feet, provided no layer of dry earth intervened. There was practically no upward movement of soil moisture except through root action.

Traveller—"Can I get anything to eat in this dump?"

Waiter—"Yas, sah, you kin."

Traveller—"Such as what?"

Waiter—"Such as it is, sah."

NATURE'S MINERAL SALTS

Chances the present—builds the blood. Nothing better for relief of Constipation, Indigestion, Rheumatism, Kidney and all ailments.

SASKASAL

Scientists Claim Islands On Atlantic Coast Are Being Slowly Washed Away

Prince Edward Island and the Magdalen Islands are being steadily washed away by the sea, according to an expert government hydrographer who has just completed a survey of their coastlines. Soft red soil of these Gulf of St. Lawrence islands, without the protection of solid rock formation, he said, makes them fall easy prey to the unceasing motion of angry waves. In two places Prince Edward Island has been nearly cut in two.

"But islanders need not worry," the expert, H. L. Leadman of Ottawa, commander of the hydrographic survey ship Cartier, reassured us. "Mother Nature acts slowly and terra firma is guaranteed the populace for many generations to come."

Then with a laugh he added: "Well, probably all be washed away before these islands disappear. The process is so slow."

Of course there were points that were disappearing faster than others. "The Magdalen Islands are changing continuously," there's Old Harry Head on Coffin Island that is falling away at the rate of 20 to 30 feet a year. The soft red sandstone is fast disappearing for the cliff drops sharply down to two fathoms and there's no sign of where the soil goes."

Prince Edward Island was a scant two miles of being cut in two by the Hillsboro river and the inlet on the north side. But the wearing away process had eased up here and nature had defeated its own purpose by building up sandbar protection against its forces.

The Cartier has been employed since 1910 in surveying Maritime provinces and Gulf of St. Lawrence waters. It has just been laid up for the winter at Charlottetown after sounding an area of 12,600 square miles bounded by the northern tip of Cape Breton Island, Newfoundland, Anticosti and Prince Edward Island.

The ever changing coastline makes constant vigilance necessary in order to preserve the safety of sea-lanes. The Cartier is a quasi policeman searching for upstarts of rock, arch-enemy of liners.

In the chart-room of this 700-ton government survey ship is the magic eye that penetrates fathoms and automatically takes photographs of the ocean bottom.

"That machine," said Commander Leadman as he pointed to the cat's paw arrangement in the corner of the chart-room, "is the most modern type of echo sounding gear. It photographs a picture of the bottom by a system of sound vibration."

Then he unrolled several feet of pictures that showed the bottom of the sea. They were taken off St. Paul's Island at the northern tip of Cape Breton.

"See those vague objects above the ocean floor?" he asked, pointing to his iodine-colored graph. "They are schools of fish which inadvertently got photographed. You see when schools of fish are dense enough they too return sound waves that are recorded by the sensitive apparatus."

Saline density and low temperatures sometimes made the machine inaccurate when the experts had to recalculate the actual depth of water. In the Gulf of St. Lawrence, 200 fathoms down, the water was below freezing, registering minus two and minus three degrees centigrade.

The Cartier's work was mostly a task of filling in the gaps in British admiralty charts, plotted as early as 1813, Commander Leadman explained. Once in a while they ran across dangerous shoals. Off Cape Whittle on the Labrador shore, adjacent to the shipping lane, they had located a threatening rock 30 feet from the surface.

In surveying the coastline, aerial photography was done first, then with it as a guide, the Cartier began her submarine photography. It was a far cry from the days of the early sounding of the gulf by the admiralty with their crude apparatus to the ocean-floor photography of to-day, the government expert remarked, but the admiralty's small scale charts are surprisingly accurate," he added.

Antelope Herds Increase

Ranchers Claim That They Are Becoming A Nuisance

Harrassed by ever-increasing herds of antelopes, fleet-footed roamers of the foothill country, southern Alberta ranchers are wondering what could be done to save their pastures for cattle and sheep.

The animals, once threatened with extinction, were protected with conservation measures and have multiplied so rapidly an open season was declared this year but Royal Canadian Mounted Police reported no applications for the special licence to hunt them have been received.

The license, costing \$5, allows hunters to bag two of the antelope.

Cattlemen complain the antelopes are eating grass needed for cattle and sheep, besides attacking hay stacks. One Wild Horse, Alta, rancher said it costs him the wages and keep of a man and the keep of three hounds in his efforts to drive the animals from his land where they eat his alfalfa, break into his hay stacks and steal the pasture of his cattle herds.

Near Wild Horse, in southeastern Alberta, a herd of 1,000 antelope were seen within a mile of Cochrane, a mining town eight miles west of Lethbridge.

Had no conservation measures been taken, it is doubtful whether any of these antelopes—the pronghorn antelope—would have survived. Protected in 1914 and 1915 by establishment of sanctuaries in Wyoming and New Mexico national parks and rigid defence of the few herds which roamed the short-grass country in southeastern Alberta, their numbers have increased to thousands.

Flocks of the animals is very destructive which accounted for the protective measures taken. Indians were killing them wholesale before game officials stepped in.

Hunters, however, are prevented by the short open season—Nov. 1 to 11—and the bag limit of two, from giving any material assistance to ranchers.

Problem For Hostess

Masterly Stroke Of Housewifery Met Difficult Situation

Suppose you were the wife of the governor of Massachusetts, suddenly called upon to serve dinner to a French admiral and 300 officers. You had invited the admiral, but never guessed he would ask to bring all his men with him. Where would you get quick supplies for the banquet, including fresh milk for so much home cooking? asks a writer in the Boston Transcript. Nowadays the task would be simple, with orders promptly given by telephone. But Mrs. John Hancock, wife of the Bay State's first governor, faced a serious crisis. In the Boston of her day, a reliable historian tells us, it was flatly "impossible to secure in legitimate ways milk enough for such a multitude at short notice. So, Mrs. Hancock dispatched her servants to the Common with direction to milk all the cows grazing there, and to send to her any person who complained. The owners were rather amused than offended by this masterly stroke of housewifery, and no one is known to have protested.

Made Good Impression

The young man waited patiently while the girl at the cashier's desk looked carefully at the new \$10 bill he had just handed her. She turned it over a couple of times, held it up to the light, felt it with her fingertips and then almost reluctantly rang up her cash register and counted out the change.

"Would you know a bad one if you saw it?" the young man asked. You. Outraged surprise flitted across her face and then suddenly she grinned and shook her head. "I don't think so," she said, confidently, "but the boss was looking and it makes a good impression on him."

Dairy Industry Of Canada

Official Of National Council Sees Big Export In Future

Appeal for "close and intelligent consideration to the betterment of Canadian agriculture" was made by Allan C. Fraser, secretary manager of the National Dairy Council of Canada.

Speaking at a Canadian Club luncheon in Montreal, Mr. Fraser reviewed what he called "the romance of the nation's dairy industry" and described the industry as part of the life-blood of the nation.

History of the dairy industry was traced by Mr. Fraser from its first stages in Asia, 2,000 years before Christ to the present day when in Canada alone there were 3,500,000 milking cows "operated" by 315,000 farmers. These farmers, he said, received an aggregate of \$200,000,000 per annum for their milk products which he said provided the "elixir" of life.

One of the great troubles in the Canadian industry, however, was the lack of uniformity in production, he said. For instance the provinces of Quebec and Ontario did not produce as much as they consumed yet the prairies, a long way from the eastern markets, produced more than could be used there.

It was such problems with which the industry was confronted, said Mr. Fraser, but with careful and intelligent consideration for these problems he thought "the day is not very far distant when, we shall be pretty definitely on an export basis for a considerable proportion of our production."

This, he concluded, would be the final answer to the difficulties outlined.

Game Ducks Disappearing

Conservation Methods Must Be More Rigorously Enforced

Six types of game ducks in North America are threatened with extinction unless conservation methods are more rigidly enforced and natural enemies of the ducks are combated. Harry C. Oberholser, senior biologist of the biological survey at Washington, said in Toronto recently. Mr. Oberholser was there for the opening session of the American Ornithologists' Union convention.

The shoveller, redhead, canvas back, gadwall, ruddy, and buff head are fast dying out, he said. Contributing causes to their rapidly approaching extinction were pollution of their feeding grounds by oil waste from ships and manufacturing plants, duck disease and destruction of their eggs by crows.

The Calf Club Show of the Dominionwide Boy and Girl's Federations at the Sherbrooke Winter Fair held recently was the largest assembly of its kind at a provincial exhibition. Two hundred and twelve Calf Club members from every district of the province of Quebec took part in showing 10 calves and yearlings and in the different judging contests for selecting teams to go to the Royal Winter Fair, Toronto.

Responsibility Of Research Workers In Regard To Human Welfare

Chalk As We Know It

Was Made Convenient For School Use By Dr. Field

One hundred years ago school chalk as we know it was invented. Dr. Field hit upon the idea of pulverizing the crude chalk, removing the grit, and then moulding it into convenient sticks. Of course there have been many refinements since that time, but the boys and girls in school to-day as well as those whose schoolbags are over, might give thanks to Dr. Field on this centennial of his invention.

The blackboard with its chalk illustrations of the countless school problems, ranging from the A's to the A's, has been an essential aid in the promotion of education. It goes with the pupil from kindergarten to university. The Chinese philosopher, who said, "one picture is worth 10,000 words," was paying an advance tribute to the blackboard and its 100-year-old teammate, chalk.

Excessive Road Speed

Highways In Good Condition Are Temptation To Driver

Neither the authorities nor the public can afford to ignore the fact that traffic experts are practically agreed in declaring that speed is the outstanding cause of highway accidents. Automobiles of to-day are capable of making greater speed than ever before. They can be operated so easily over roads that, generally speaking, are in excellent condition that drivers unconsciously hit up their rate of travel to an unsafe speed. However mechanically perfect an automobile may be, it cannot be brought to a stop as quickly when running at 60 miles an hour as at 30. There is no doubt that thousands of accidents happen because motorists who do not consider themselves reckless drivers forget that at any moment they may be confronted by a situation that necessitates a quicker stop than they can possibly make.—Baltimore Sun.

The Only Drawback

Two old settlers, confirmed bachelors, sat in the big woods. The conversation drifted from politics and finally got round to cooking.

"I got one o' them cookery books once, but I never could do nothing with it."

"Too much fancy work in it, eh?" "You're said it. Every time they recipe began the same way: 'Take a clean dish,' and that settled me."

Science is growing into a Frankenstein monster which soon the scientists of the world themselves may not be able to hold in check.

This fear is expressed by Sir Richard Gregory, one of the greatest scientists in Britain. Other scientists agree with Sir Richard.

Two years ago, the British Association formed a "brain trust" in an attempt to put the monster in chains, but Sir Richard now admits that the attempt has failed.

A short time ago, Sir Richard in a dramatic speech at a Rotary luncheon at Norwich, Norfolk, defended the modern scientist and tried to explain that the man with a test tube is not a man with a load of mischief. He said that the use of good or evil of a discovery depended on the community.

Now, however, Sir Richard has changed his mind and frankly admits that there is justification in the increasing uneasiness and suspicion with which the ordinary man is viewing the efforts of the laboratories.

"Ethical considerations are almost totally non-existent among scientists," he observed. "To them new knowledge is the thing."

Just recently I saw a description in a technical journal of some new mustard gas.

"The scientist who published that paper did not speak of his discovery as a mustard gas. . . . He had merely effected a re-grouping of certain compounds."

"To him his achievement was merely an interesting piece of research in organic chemistry, and he just stated the facts. But the world has another view of the gas."

"The biggest job which faces us to-day is to solve this old problem of the responsibility of the scientist with regard to his discoveries and the rest of the community."

"One man of research properly applied might find a cure for tens of thousands, and another throw thousands out of work. One result of research wisely applied may save human lives and another destroy them."

"It is manifestly wrong that the scientist's responsibility should end with the announcement of his discovery."

A. G. Church who, as an executive of the British Science Guild and the Association of Scientific Workers, was concerned with the British Association plans for a "brain trust" to maintain a check on discoveries and their applications is not hopeful for the future. He particularized:

"The efforts we made to get scientists to weld themselves together into a profession with a corporate sense of responsibility like lawyers, doctors, and others, have failed absolutely."

"Some time ago we made an attempt to find out how far scientists were prepared to limit themselves against work which might have harmful potentialities to the community."

"Professor Sir Frederick Soddy suggested a resolution that members should not accept subsidies to engage in special research work into poison gases for military purposes."

"Our members would have none of it. Eventually a resolution was passed to the effect that university teachers should not accept subsidies for such work as this would be contrary to the spirit and tradition of learning."

"The trouble is that the average scientist is far more arrogant about his work than the normal man, and he declines to admit any measures which he considers a restriction on the pursuit of knowledge."

"But 'this freedom' in research has great dangers to the world to-day."

"We ought to have an ethic like other professions. It is up to the great leaders of science to give a lead in this respect. It is time that the man in the laboratory realized how his work affects the man next door."

A locomotive built in England for use on a mountain railway in South Africa has six separate engines, any one of which can be disconnected in an emergency without impairing the efficiency of the others.

Make This Doll Elephant Mascot

PATTERN 5461

Even though the circus isn't here, this elephant gets applause. That's certain—whether he's a toy for the baby or a mascot for that young lady who has her favorites in football stars. He's a merry fellow and you'll be merry, too, in making him, for he goes together so easily. Do him in a gay print—do him in velveteen—he's choice in either.

In pattern 5461 you will find a pattern and directions for making an elephant about 10 inches high, making the requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

STOPS ITCHING

In One Minute
D. D. D. Prescription Speeds Relief

For quick relief from the itching of pimples, nose-itch, or other insect bites, eczema, rashes and other skin eruptions, apply Dr. Deming's D. D. D. Prescription, liquid, antiseptic D. D. D. Prescription. Forty years' world-wide success. Penetrates the skin, soothing and healing the inflamed tissues. No fuss—no mess. Clear, greaseless and stainless—dries up almost immediately. Try D. D. D. Prescription. Stops the most intense itching instantly. A 5-cent trial bottle, at any drug store, is guaranteed to prove it—or money back. D. D. D. is made by the owners of ITALIAN BALM.

CHAPTER VIII.—Continued

There followed a silence until Cousin Columbine exclaimed: "Dear me! Here I am dwelling on the past like an old woman, when what I started out to tell you was why I wrote that idiotic letter. You see, my mother instilled into me the knowledge that we came of gentle people—finer people, perhaps, than some of our good neighbors. She was an orphan, with no near relatives of her own; but she was very proud of the Nelson connections, and always kept up to certain standards. If we lived in a cabin with a dirt floor, at least, there were spotless curtains at the windows, and we ate off a white tablecloth, clear as too! I think her dream was to send me East for an education; and long as they lived she corresponded with Father's parents, something he might have neglected to do himself. Later she wrote down the names of the younger members of his family, among them your Grandfather Nelson's, Father's half-brother, telling me that if I were left alone and needed help, I was to appeal to them."

"Did you ever have to?" queried Nancy.

The old lady shook her head.

"But I kept telling them, as Mother would have wished. Many have died, of course; for Father was so much older than his half-brothers that he was almost of another generation."

"It must seem strange never to have seen any of your own people," commented Jack.

"Not only strange," said Cousin Columbine, "but sad, in a way. It was that sadness which caused me to make a resolution to see some one belonging to me—some one of my own blood, before I died."

"But why didn't you go East for a visit?" questioned the boy, forgetting the conversation he had felt at this idea when, weeks before, Aunt Louise had read aloud the letter from their distant relative.

"Because," responded the astute old lady, "I was not sure of a welcome! I realized that I was nothing to my Eastern cousins but a bit of family history—a queer old woman, perhaps, who was born in a covered wagon, and whose life had been lived in a little Colorado town. Besides, I dreaded to be away from home, even temporarily. My roots go deep, like the roots of an old tree that has never been transplanted. I admit I toyed with the idea; but gave it up; and the next thing was to get some of you to come to me."

She paused, and Jack said, smiling: "But how did you happen to pick out Nancy?"

"I could hardly expect the older members of the family to drop their work and come at the whim of a cousin whom they had never seen, could I? Besides, I had a yearning for some one young. But I've read about these modern girls, Nancy, and was just a bit afraid. Suppose, I asked myself, suppose I get her out here and find she is one of those—those flappers?"

Both young people gave way to

laughter, the word sounded so strange on the old lady's lips.

"Do you see now," asked Cousin Columbine, "why I wrote that letter?"

"You mean," said Jack with sudden inspiration, "that no flapper would have accepted your invitation?"

"That's it, exactly. No girl whose sole pursuit was pleasure and society, would have been willing to put up with such a situation. But a girl like Nancy, would, I was sure, be glad to help out a poor old lonely cousin. So I made the job as unattractive as I could. It's true that Aurora doesn't do everything my way; and that often I'm desperate for some one to take a stitch for me, since I loathe the very sight of a needle, and always did. Oh, there was enough truth in that letter so it didn't lie very heavily on my conscience. And when I read it over I said to myself: 'Columbine Nelson, no one but a good, sensible, old-fashioned girl could consider this proposition for a minute; and you don't want the other kind.' So I mailed the letter."

The room was silent for a moment. Nancy's cheeks flamed, not solely from her close proximity to an air-tight stove. What would Cousin Columbine think if she knew how impossible that proposition seemed to her—that nothing in the world save Dad's financial losses would have made her give it a second thought—that she wouldn't have considered it even if Jack hadn't thought out this scheme and put it through while she fought (or wanted to) to the last ditch? Nance knew she was smiling under false colors, and didn't like it. She even avoided meeting her brother's eyes as she responded: "I'm afraid you'll be awfully disappointed in me, just the same."

"No," asserted Miss Columbine briskly, "I asserted like a person at first sight, or I don't like them. Been that way always. I'll admit you look rather ornamental; but that's nothing against you if there are braids in that pretty head of yours, and I don't doubt that, you being a Nelson."

As for your brother, his brains were evident in the letter he sent me. Back in my father's day he would have been a pioneer."

Nance laughed.

"I can't see Jack driving a covered wagon, Cousin Columbine."

"You don't have to in these days of automobiles. But he's got the spirit, and that's what counts, my dear."

Jack flushed now, not being as sure as Cousin Columbine that he possessed the courage of his forefathers.

"When do I go to work?" he questioned, in an effort to change the conversation.

The old lady hesitated, and then said: "Here's my second confession: When I sent that telegram I had a job for you on the McKenzie ranch over Divide way; but the next day Mrs. MacKenzie telephoned that her nephew from Boulder wanted the place after all. Don't look distressed, Jack. You'll have a job before the week is up. I hoped the Adams would have something for you to do, but there are so many boys in the family they seldom hire outside help."

Jack was frowning a little. He said: "I must get something as soon as possible, Cousin Columbine. I don't want to sponge on you for board."

"Fiddledicks!" she retorted. "This is the first time I've had company in fifty years. But I've asked Mark Adam to be on the lookout; and he'll find something if anybody can. He's smart as a whip; and a good boy in the bargain. All the Adam boys are good. I've always said that if Eve Adam isn't much of a cook, she's a grand success as a mother. Four sons, and every one a credit to the name."

"Eve!" laughed Nancy. "How did she ever dare to marry a man named Adam?"

"Because," replied the old lady with a twinkle, "she'd set her heart on doing just that thing—always said that when she found an Adam was going to rope him. What she wanted was to find one with Adam for his first name; but when John Adam came along she snapped him up—at least, that's the way she puts it. Eve was a Denver girl. Her

father made considerable of a fortune in gold in 1878, and lost it as many others did just then. After years of hardships, so much money went to their heads. Eve's father bought stock in fraudulent companies, and when the boom collapsed—well, he collapsed with it, you might say."

"Were they left with nothing at all?"

"Practically. But Eve's uncle in the East had money, and gave the girl an education. She was in Boston for three years; and on her way home she met John Adam on the train. He was going to California for his health; but when he saw Eve he decided that his health wouldn't be much use to him in California. If she was in Colorado. You needn't grin, Jack. It was just like that—love at first sight. And when she found his name was Adam, that settled it."

"Did he get well?" asked Nancy. "Mercy yes! As for the boys—you've seen two of 'em. They don't look like invincible warriors."

"And there are two more?"

Cousin Columbine nodded.

"Luke's eighteen, and John will be—"

"You don't mean," gasped Nancy, "that they're really named like that—Matthew, Mark, Luke and John?"

Jack roared with mirth, and Cousin Columbine's eyes lighted.

"Indeed they are. Folks at Pine Ridge are used to 'em and never think about it; but I dare say it sounds queer to outsiders. That was Eve's doing. She's sort of fanciful and dreamy. But she's a wonderful woman and her husband worships the ground she walks on. I wish I could have got you a job there, Jack. They're fine people the Adams. Goodness gracious, children! it's almost eleven o'clock! I haven't set up so late since 1902 when the schoolhouse burned down and Aurora pounded on the door to wake me up on her way to the fire. Breakfast at seven. We'd better be getting settled for the night."

It had, Nance admitted, as she smuggled down under the heavy patchwork quilt, been an interesting evening. After all, she wouldn't write that letter to her father—not yet, anyway.

CHAPTER IX.

More than two weeks slipped by with no sign of a job for Jack. This troubled the boy, though Cousin Columbine insisted that he was then earning his board by chopping firewood—new work to Jack, though when his sister consoled with him one afternoon, he declared he enjoyed it.

"But just the same, Nance," he added, lowering his voice that Aurora Tubbs, peeling potatoes at an open window, shouldn't hear, "I'm worried. I've got to earn some money; I've got to earn some money; body 'round here needs a ranch hand? Mark's been inquiring everywhere and hasn't got so much as a bite. Say!" (starting off his sweater and tossing it upon the ground), "can you believe it's December first?"

Nance couldn't. There was a tang to the air, but the day seemed more like late fall than winter; and the sky was as blue as it is possible for a sky to be.

"I think," Nancy conceded as she perched precariously on the chopping block, "that this bright sunshine keeps us from being homesick. Since that first afternoon I've had

only a few twinges; though I rather dread the time when we're settled down and you away somewhere. Cousin Columbine says we ought to be seeing some of the points of interest around here. I'm going to climb that hill off to the north. Do you want to come?"

"Can't just now. You run along alone, Sis. Look here!" (as she started off), "haven't you got anything but those silk stockings?"

"That's exactly what I asked her this morning." Aurora's voice came through the open window. "Like as not that black and white pair of hose will be full of runs when you get back, Nancy Nelson. Why not borrow a pair of Miss Columbine's black cottons?"

Jack was obliged to hide a grin at a vision of his fastidious sister in cotton stockings; and Nance replied, almost impatiently: "Oh, see here, Aurora, didn't Juanita have on silk stockings at the post office this morning?"

"If she did, I'll paddle that girl when I get home," asserted the good woman. "Juanita Tubbs wears silk stockings in the morning! What's the world come to?"

"Mercy!" gasped Nance. "Have I got Juanita into trouble? I hope not. Next time we go down to the Springs, Aurora, I'll buy some women's sport hose. I thought I packed a pair, but can't find them. Now don't worry any more on that subject. How do I reach that hill—the one with the pine trees on it?"

THE RHYMING OPTIMIST

By Aline Michaelis
AFTER LOVE

Love may come a little while
When care waxes or strife;
Love may walk with you a mile
And an April hour beguile,
Only, in your life.

But forever and a day,
Echoing love's song,
After love has passed away,
After gods have turned to clay,
Memories will throng.

Memories of love's kiss, love's glance,
These will wake anew,
With their aura of romance
Bringing back, through change and chance,
Joy again to you!

Three hundred chicks have been hatched and successfully reared at Bure, France, from the Canadian Record of Performance stock imported in 1934. As a consequence, representatives from France are to visit Canada this year to make more purchases of Canadian R.O.P. stock.

When we can not find contentment in ourselves, it is useless to seek it elsewhere.

Little Helps For This Week

"Who is among you that feareth the Lord, that obeyeth the voice of His servant, that walketh in darkness and hath no light, let him trust in the name of the Lord and stay upon His God." Isaiah 50:10.

When we in darkness walk, Nor feel the heavenly flame, Then is the time to trust our God, And rest upon His name.

He has an especial tenderness for those who are in the dark and have no light, and His heart is glad when they say "I will go to my Father." For He sees thee through all the gloom through which thou canst see Him. Say to Him, "I am Thy child, Forsake me not." Then fold the arms of faith and wait in quietness until the light goes up in the darkness. Think of something you should do and go and do it, if it be but the sweeping of a room, the preparing of a meal, or a visit to a friend, heed not your feelings, but do your work.

Life Of Parliaments

Would Limit Length To Minimum Of Five Years

That five years should be the minimum effective life of parliaments in the empire was one of the suggestions made by Sir Arthur Weigall, chairman of the council, presiding over a luncheon tendered by the Royal Empire society to the delegates from empire parliaments meeting in London.

He also suggested civil servants in Britain and the Dominions should be inter-changeable; and that both in Britain and the Dominions the governments should include a definite number of ministers without portfolio.

With a parliament of less than five years, said Sir Arthur, the ministry was standing in the stirrups and looking for an election rather than settling down in the saddle. (Australian and New Zealand parliaments are limited to three years.)

Root Action Extracts Moisture

One foot of the heavier type of Saskatchewan soil will hold the equivalent of two inches of rain. A long series of experiments at Swift Current experimental farm by Mr. Taggart, minister of agriculture, has shown that wheat roots would extract moisture from the soil to the depth of six feet, provided no layer of dry earth intervened. There was practically no upward movement of soil moisture except through root action.

Traveller—"Can I get anything to eat in this dump?"

Waiter—"Yes, sah, you kin."

Traveller—"Such as what?"

Waiter—"Buck as it is, sah!"

WORLD HAPPENINGS BRIEFLY TOLD

More than 80 anarchists have been arrested in Tokyo and Osaka and are being held on charges of planning an anarchist uprising.

The full name of the Duke and Duchess of Kent's son will be Edward George Nicholas Paul Patrick. It was unofficially reported. He will be known as Prince Edward of Kent.

Canada, in time, will have a population of 179,000,000, it has been predicted by Prof. Griffith Taylor, formally inducted into the new chair in geography at the University of Toronto.

People who live on streets with English, French and Belgian names in San Remo, Turin, Milan and other Italian cities have asked authorities to change them to "Aduna", "Makale" or "Italia".

Sergeant-Pilot Park, whose home is in British Columbia, and two other men of the Royal Air Force, were instantly killed when two planes collided 3,000 feet over the Abingdon station.

The Alberta government will enforce the provincial Trade and Industry Act, after certain changes, the Calgary branch of the Retail Merchants' Association has been assured by Premier Aberhart.

The Young Women's Christian Association announced that Lady Tweedsmuir, wife of Canada's new governor-general, had consented to become patroness of the association in Canada.

Another step in the modernization of ancient Palestine was taken recently when the Arab town of Tul-karem, in the central part of the country, was illuminated with electricity for the first time.

Notwithstanding the recent series of fatal airplane crashes, U.S. senate commerce subcommittee investigators have concluded after a thorough survey that travel by air today is "three times safer than it was 10 years ago."

In Italy, where the cost of a radio receiver license is high, there are only about 200,000 radios in a population of 40,000,000.

Pioneers Honored

Cairn Unveiled By Founder Of First Icelandic Settlement

The dramatic history of Icelandic pioneers who first landed on the shores of Lake Winnipeg in 1875, was fittingly marked 60 years after when a memorial was unveiled at Gimli, Man., by Captain Sigtryggur Jonsson, first discoverer of the site of what is now Gimli.

Jonsson, approaching his 80th year, brought the first group of Icelandic settlers to Gimli in 1875 from Moorhead, Minn., by way of Winnipeg. The party made the trip in a cow constructed in Winnipeg, and sailed down the Red river and along the west shore of Lake Winnipeg to their new home.

The cairn, built of local granite stone, has a 13-ton red granite boulder fixed to the top, symbolizing the lasting qualities of the early pioneers. On the west side of the boulder, engraved in Icelandic and English, is the following inscription: "The first Icelandic settlers arrived here Oct. 21, 1875." The names of the various districts of the first settlement are carried on the reverse face of the cairn.

Climbing Out Of Depression

British Dominions Seem To Be Leading The World

Which are the nations who are climbing most rapidly out of the depression? They are the British nations. Canada's trade leaped up 22 per cent last month. Inspiring news comes also from little New Zealand, where Mr. Coates, the finance minister, boldly states that the Dominion's economic problems are "largely solved." Cuts are being restored, emergency taxes reduced, pensions increased. On top of that Mr. Coates gives a new break to his countrymen. Population of New Zealand, 1,618,000; public works expenditure announced, \$5,830,000. That means the inauguration of new booms and amenities for New Zealanders at the rate of \$3 10s a head.—London Daily Express.

SUNDAY SCHOOL LESSON

NOVEMBER 24

THE MESSAGE OF HAGGAI

Golden text: I was glad when they said unto me: Let us go unto the house of the Lord. Psalm 122:1.

Lesson: Ezra 3:1 to 6:22; Psalm 84:1-12; Haggai, Chapters 1, 2; Zechariah 4:1-10.

Devotional Reading: Psalm 122.

Explanations and Comments

Combating the Mental Attitude of the People, Haggai 1:1-5. This address of the prophet Haggai was made to Zerubbabel, the governor of what was now the Persian provinces of Judah, and to Joshua, the high priest, in the sixth month, in the first day of the month, in the second year of Darius the Persian king, B.C. 520.

"It is not the time for us to come, the time for Jehovah's house to be built," the disheartened people were saying, but Haggai was sure that it was the time God would have them build. They were waiting for the right time, the psychic moment, as it were, to build, but they had not waited for the time to build their own houses, the prophet reminded them. Some of them had built exceptionally fine houses, paneled with costly cedar, but the site of the house of Jehovah was still lying waste, although they had now been living for 12 years in Jerusalem. The trouble was that they lacked the desire, and Haggai used forcible words to arouse their desire. If they really desired the temple, they would build it.

The people had sown much and brought in little. A drought had been upon the land, withering everything (verse 11); they had lacked food and drink enough to satisfy themselves, and clothes enough to keep them warm; and so low were the wages paid that it seemed as if the money was lost as soon as it came, as if it just dropped through holes in a bag. All this was true: what was the prophet's remedy? He challenged their conscience. "Now, therefore, thus saith Jehovah of hosts, Consider your ways," he twice repeats. Consider "what you have been doing. All had been zealous about building their own homes, and had given no thought to the house of Jehovah, verse 9. They had only themselves to blame.

Ye looked for much, and lo, it came to little; and when ye brought it home, I did blow upon it. Why? said Jehovah of hosts. Because of my house that lieth waste, while ye run every man to his own house. Therefore for your sake the heavens withhold the dew, and the earth withhold its fruit.

The Result of Haggai's Appeal, Haggai 1:12-15. Within three weeks the temple site presented a busy scene, for, inspired by the prophet's words, the governor and the priest and the people all began to work upon the temple building.

Endorses Light Clothing

Welsh Doctor Believes It One Preventive Against T.B.

During a discussion on his annual report, Dr. Milton Jones, medical officer for Llanyfyllin rural council, said he found girls under 20 were less susceptible to tuberculosis than boys under 20, and the reason was that girls wore scanty clothing, which allowed sunlight and fresh air to get at them. Women, too, were less susceptible to tuberculosis than men because they wore less clothing. When the doctor said that with correct diet nobody need suffer from indigestion a member remarked that doctors suffered from indigestion. Dr. Jones replied that that was because doctors were so often called away from their meals.

One large duck farm in Eastern Canada is planning to ship 2,000 boxes of ducks to England before the close of navigation at Montreal and to hold them in storage for subsequent sale.

ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons instead of their doctors'—on remedies for their children.

If they knew what the scientists know, they would never take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, for over 60 years have said "PHILLIPS' Milk of Magnesia—the safe remedy for your child."

Remember this—And Always Say "Phillips" When You Buy. Your child deserves it; for your own peace of mind, see that you get it—Genuine Phillips' Milk of Magnesia.

Also in Tablet Form:

Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

Fire Chief Battles Flood

Rescued People From Flooded District in Montreal

Arthur Ferron, acting district chief of the Montreal fire department, has celebrated the 30th anniversary of his joining the fire fighters. In the years since he joined the brigade he has been repeatedly decorated for brilliant rescue work at bad fires, but his greatest rescue had nothing to do with his arch enemy. In the half light of a below-zero dawn, a three foot water main burst in a crowded Montreal district. The streets were flooded and houses were collapsing when Capt. Ferron and his crew arrived. Despite the imminent danger, however, this veteran smoke-eater rescued two entire families who were on the point of drowning. For his bravery he received the Royal Canadian Humane Society's life-saving medal.

MAY ESTABLISH AIR MAIL ROUTES ACROSS CANADA

Ottawa.—Aviation interests see in the conference to be held here towards the end of the month between representatives of the United Kingdom, the Irish Free State, Northern Ireland and Canada, a promise of considerable development in commercial aviation in this country. For some years after the war great strides were made in Canadian flying, but the era of administrative economy that descended on the country five years ago called a halt to this progress.

Flyers take the stand that to establish a trans-Atlantic air service only would be an expensive and unfinished policy. In order that full benefits be derived from it, they declared, there must be a steady and progressive development in the trans-continental services in Canada itself. At one time postal and passenger services operated from Rimouski to Montreal. There the United States lines were picked up and air travellers could cross the continent to Canadian points by using the United States lines from Albany to Grand Forks, N.D.

Canadian services ran from there to Winnipeg, and westerly to the Rockies. As an alternative route, air travellers could fly from Montreal to Toronto and Detroit, picking up the U.S. lines at that city.

Cutting down of the government air mail, however, made the Canadian lines unremunerative and they were gradually dropped, and a few air mail lines are now operated, and there is no exclusively Canadian trans-continental service.

Those interested in aviation expect that, should the Imperial Airways establish its trans-Atlantic service, the Canadian government will re-enter the field by establishing the old air mail routes. It is expected also that, instead of Canadian lines being dependent on United States lines to cover the gap from Montreal to Winnipeg, advantage will be taken of the work done in the past four years to building landing fields north of the Great Lakes. There are now between 80 and 100 emergency landing fields either completed or approaching completion, thus creating a purely Canadian flying route from the Atlantic to the Pacific.

Tales Of Heroism

43 Persons Rescued From Shipwreck By Destroyer

Manila.—How survivors sang on wave-lashed rocks to keep up their spirits as they saw comrades die was told here when the destroyer Peary docked with 43 persons rescued from boiling seas where the freighter Silverhead crashed.

Tales of heroism and horror revealed one woman victim went insane before drowning and that the vessel's missing captain surrendered his life belt to a crew member, then disappeared while trying to save his pet dog.

Bodies of two of the disaster's four victims were brought here by the destroyer. Practically all the survivors were suffering from exposure or minor injuries and two crew members who contracted pneumonia were rushed to hospitals.

The vessel, carrying five passengers and a crew of 49, crashed while en route here from San Francisco, but all survivors were rescued by rafts.

On these, the survivors floated out to where rescuers from the Peary and the destroyer Bulmer could pick them up.

Other survivors told how Capt. H. A. Lennard surrendered his life belt to an unprotected crew member as the last raft was ready to leave the rock for the rescue craft, 1,000 feet away.

When all others were aboard the raft, the captain tied his small dog around his neck and plunged into the water. He swam a short distance, but the dog's weight apparently was too much, and both disappeared in the turbulent waters of San Bernardino straits.

Air Route Over Rockies

Pass In Northern British Columbia Discovered As Ideal

Vancouver.—A 100-mile-wide gap in Canada's towering western mountain ranges was described as near perfect for a trans-Canada air route by Dr. Charles Cammell, federal deputy minister of mines, told delegates of the western meeting of the Canadian Institute of Mining and Metallurgy.

He discovered it during his recent aerial tour of northern British Columbia, southeastern Yukon and the region from the Mackenzie district to the Arctic ocean.

Far up in British Columbia's hinterland close to the borders of the Yukon and the Northwestern Territories, the Rocky Mountain range pinches out and between there and the start of the Mackenzie range is the gap which is the only wide opening of the Canadian cordillera, Dr. Cammell said.

It offers far less hazardous flying conditions than any other gateway to the coast, he said, not only because of its width but because it has from 1,000 to 1,700 feet less altitude than other mountain passes, and, in addition is of a flat plateau nature with easily adaptable landing features.

In addition to his important exploration of hitherto unknown territory, Dr. Cammell exploded the myth of the so-called tropical valley in the Liard river district.

"I've been there in winter and in summer and there certainly is no indication of tropical climate or vegetation," he said. "True, there are a number of hot springs, some of which do not freeze over in temperatures of 30 degrees below zero, but they have no effect on the climate. They do affect the vegetation to a certain degree, however, and the grass grows as high as seven feet with other vegetation corresponding to luxuriant."

Check Wheat Board Work

Meeting Of Sub-Committee Was Merely General Survey

Ottawa.—Checking work on the Canadian wheat board, a sub-committee of the cabinet going direct jurisdiction over activities of the body held a lengthy meeting. The conference was described as a general survey.

There was no intention to force Canadian wheat on the market even at sacrifice prices, it was said following the sitting. Minimum price for No. 1 Northern at Port William was fixed at 87½ cents a bushel as one of the first official acts of the wheat board which was named early last summer.

All heading departments closely allied with the wheat industry, Hon. W. D. Euler, minister of trade and commerce, is chairman of the sub-committee, with Hon. Charles Dunning, minister of finance, and Hon. James G. Gardiner, minister of agriculture, as associates.

Landed Passengers Safely

Pilot Suffered Heart Attack But Stuck To Control

Bakersfield, Calif.—Captain Donald Buckman, 34, United States army pilot, won and lost an air dash against death when he safely landed three passengers at the airport here, only to collapse and die a few minutes later. Flying from March field, Captain Buckman apparently was seized with a heart attack as he raced through the air. Sticking to the control, he brought the plane down without mishap at Kern airport, and then disclosed to field attaches that he felt ill. He died 20 minutes later.

Research Library Closed

Montreal.—Without financial support for the past two years, the Gest Chinese Research Library, considered one of the finest of its kind in the world, has been permanently closed to the public. It was unofficially announced the library would be placed in storage immediately.

Judge For Seventh Year

Chicago.—For the seventh year, Walter Bigger of Dalbeattie, Scotland, will preside as judge of the international livestock exposition, a noted livestock authority, will begin judging when the exposition starts on Nov. 30.

SIR BASIL BLACKETT

One of the most eminent of British financial experts, who was killed in Germany when a train struck his automobile. He visited Canada in 1932.

Wheat Crop Less

Second Estimate Shows Production Lower Than Expected

Ottawa.—The Dominion bureau of statistics estimated Canada's 1935 wheat crop at 273,971,000 bushels, about 2,000,000 bushels less than that of 1934.

The crop report containing the second estimate of the wheat yield brought production down from a Sept. 11 estimate of 290,541,000 bushels to place it slightly below the 1934 yield while estimated yields of most other cereal crops were higher than those of last year.

The report said the 1935 season was similar to that of 1934 in that threshing returns did not fully substantiate first estimates of grain production.

Ons at 416,369,000 were almost 33,000,000 bushels less than in the Sept. 11 estimate but still well above the 1934 production of 321,120,000 bushels.

The report said reduction in this year's estimates was caused mainly by frost damage in Saskatchewan and Alberta. The bureau was forced to reduce the barley estimate by 7,000,000 bushels while flaxseed and rye also came down as threshing returns failed to support previous computations.

An Italian Reprisal

Suppliers For London Perfumery Firm Withdraw Credit Facilities

London.—An Italian agent, believed to be the first reprisal against Great Britain for imposition of League of Nations sanctions, was reported by the British press.

A London firm of perfumery manufacturers received a cablegram from its suppliers in Italy, reporting its credit facilities there had been withdrawn.

Coming To Canada

Ottawa.—A delegation of British textile manufacturers is now on the way to Canada to attend the tariff board hearings in connection with rates of duty on cotton and other textiles next month.

Canadian Wheat Board

John I. McFarland May Continue As Head

Ottawa.—Reports here say John I. McFarland may continue as head of the Canadian wheat board. While the future of the board is a matter which has not been considered finally by the new administration, it has been understood he likely would be asked to continue and in this event he would remain long enough to bring his marketing policy to a conclusion.

Named last August, the other members of the board are D. L. Smith, vice-chairman, and H. C. Grant, all of Winnipeg. So far at any rate no requests for resignations have been sent to Mr. McFarland's associates, it was stated.

Record Flight

Jean Batten Crosses Ocean In Thirteen Hours

Pernambuco, Brazil.—New Zealand's young and adventurous girl flyer, Jean Batten, stepped from her aeroplane at Natal, being the first of her sex to fly alone across the South Atlantic.

She flew 2,281 miles from Thies, French Senegal. Her time of 13 hours and 15 minutes for the ocean hop bettered the solo record set by the Spaniard, Compo, of 14½ hours.

The youthful flyer, who took off from Lympe airport near London, also broke the record set by Capt. James Molton of 82 hours and eight minutes from Lympe to Natal. She made the flight in 61 hours 15 minutes.

Permit Not Renewed

Correspondent For Nazi Newspaper Cannot Stay In England

London.—Leopold Von Hoersch, German ambassador to London, called at the foreign office for an explanation of the non-renewal of the permit to stay in England of Dr. H. D. Thost, whom the British press generally considers liaison officer for Adolf Hitler.

It was officially stated Dr. Thost's permit was not renewed "in the public interest." No protest or representations had been made, it was said.

Dr. Thost's announced post was that of correspondent for the Nazi newspaper Der Angriff. He left by planes for Berlin.

To Be Deported

Man And Woman, Held At Request Of British Authorities, To Be Returned To England

Quebec.—Deportation to England was ordered by Canadian immigration officials here for the man and woman held here at the request of British authorities under suspicion of complicity in the \$20,000 jewel theft from the London home of the Earl of Portarlington on Nov. 3.

The deportation order was announced on conclusion of an official enquiry into the couple's right of entry into Canada. The chief immigration officer at Quebec stated the pair were considered undesirable.

IMPORTERS OF BRITISH GOODS TO ASK REFUNDS

Ottawa.—Opening the door to a volume of applications for refunds from importers of British goods, a judgment has been handed down by the exchequer court of Canada in a test case ruling the minister of national revenue had no power to collect dumping duties on goods entering Canada from Great Britain since Nov. 25, 1932, following the Canada-United Kingdom trade agreement.

At that time the Customs Act was amended to exempt British goods from dumping duties under arbitrary valuations by the minister of national revenue. However, arbitrary valuations continued to be levied.

The case was that of Blaikie and Company, Toronto, importers of hats from Great Britain. Under the decision the refund that other importers might ask on the strength of the judgment would be considerable, although national revenue officials were not prepared to make an estimate.

The decision confirms rulings of the tariff board more than a year ago in appeals of Thomas Bonar and Sons of Montreal, importers of jute twine from Shetland, and Blaikie and Company that orders-in-council fixing arbitrary valuation of British imports coming in under the British preference were invalid.

Food Supplies Available

Manitoba Farmers In Crop Failure Area Receive Help

Winnipeg.—Food supplies to replenish lean larders in a triangular community affected by crop failure on the northern eastern shores of Lake Winnipeg were ready for shipment last week. Relief officials were busily engaged in a check with municipal officials to ascertain further needs.

The government of Manitoba would undertake that no person would go hungry," Hon. W. R. Chubb, Manitoba minister of public works, told a deputation from the federal constituency of Selkirk. Municipal officials declared a large number of farmers were without enough to eat.

The district affected includes the rural municipalities of Gimli, Bristow, Armstrong, Erickdale, Coldwell and Rockwood. Majority of the farmers cultivate small parcels of land to mixed farming. They grow only enough wheat to supply themselves with flour.

Seek Further Loan

Alberta Government Needs Funds For November Financing

Edmonton.—Federal loan of \$2,000,000 to carry the Alberta government until the end of November if the province's general application for financial assistance cannot be submitted to Ottawa before the Dominion-provincial conference on Dec. 9, has been applied for, Premier Aberhart said.

"We have made this proposal to Hon. C. A. Dunning, minister of finance. There has been no reply yet," said the premier.

The Alberta government is anxious to have an earlier conference with the Dominion in order to submit its refinancing proposals, which also involve a refunding scheme. As the Ottawa conference was postponed, the province faces the problem of handling this month's financing.

Value Of Education

Theory That There Has Been Too Much Education Is Termed False

Woolville N.S.—The theory that too much education had been one cause of the depression was termed "false" and "stupid" by Dr. H. M. Tory, former president of the National Research Council of Canada, in receiving an honorary degree of doctor in civil law from Acadia University.

"A people ripe in intelligence," he said, "no rise the state." He declared modern science had created far more jobs than it had destroyed.

With the recent death of the Duke of Buccleuch, father of Lady Alice Montagu-Douglas-Scott, wife of Prince Henry, the Earl of Dalkeith succeeded to his father's title. Here we see the new Duke and Duchess of Buccleuch.

The Curling Contest.

The annual contest at the
local curling rink between the
President's and V. President's
teams continues. Much time
has been lost of late by the
curlers, and all are behind the
schedule. All the rock-tossers
are now working overtime, to
catch up, and we may see an
end to the contest early next
week. The 2 sides are fairly
even, up to the present, and
it is still a guess as to which
side will be mulcted for the
cost of the annual banquet
which is held at the close of
this competition.

Spruce Grove News.

John Singer, son of Mr and Mrs
John Singes, passed away in an
Edmonton hospital on Friday, De-
cember 27, aged 28 years. He is
survived by his parents; 1 brother,
Henry; 6 sisters—Mrs. H. Schellen-
ger, Mrs. M. Bredo, the Misses
Katie, Freda, Clara and Ruth
Singer, all of Spruce Grove Dist.
A private service was held at the
family residence on Sunday after-
noon at 1 o'clock, and a service
was held later at Peace Lutheran
Church, Spruce Grove. Rev. H.
Kuring officiated and interment
was made in Spruce Grove ceme-
tery.

Postpone Sacred Meet.

The big Social Credit meet-
ing announced for tomorrow
Friday, January 3rd, in the
City of Calgary, has been in-
definitely postponed. Diffi-
culty in securing a suitable
meeting place on the date
planned for, has been given as
the reason.

LOST, 1 purebred Tamworth
Sow; wt. 160 to 170 lbs.;
all red. Return to Fred Litzen-
berger, Stony Plain. te

Stony Plain and District.

Miss Marie Gannon re-
turned from Calgary, to partici-
pate in the Christmas cele-
bration at her home here.

Mr. H. B. Bjork, who had
been operating a butcher shop
in Stony for several years, has
retired from the retail meat
business.

The local Public and High
schools, which have been clos-
ed for the Christmas holidays,
re-open tomorrow, the 3d.

A motor truck, while pull-
ing away from in front of a
Main street shop on Saturday,
was in collision with a car
heading north. The car escap-
ed damage, but the truck had
one of the fenders badly in-
dented.

Stony was the deserted vil-
lage Tuesday night. There be-
ing no entertainment offered
here then, practically all the
young people went elsewhere.
A contingent followed the S.
P. Band up to Onoway, while
a much larger bunch left for
the City.

BUTTER AND EGGS WANTED
At The Royal Cafe.

Prof. Baepfer Leaving.

Prof. W. A. Baepfer, promi-
nent in Lutheran church cir-
cles in western Canada for
the past 21 years and member
of the Concordia College staff
in Edmonton since 1923, left
Edmonton on Sunday, to take
up new duties at the Luth-
eran theological seminary at
Springfield, Ill. The professor
is well known here, having
preached in St. Matthew's
church on several occasions.

Sacred M.P.'s to Meet.

A caucus of Social Credit
members of the House of
Commons will be held in Ed-
monton Wed. Jan. 8, accord-
ing to announcement made by
J. H. Blackmore, the leader.
Matters of policy will be dis-
cussed at the caucus. This
caucus will be attended by
all 18 of the Alberta members,
including Mr. W. F. Kuhl, the
member for this riding. It is
expected the 2 Social Credit
members from Saskatchewan
will attend the meet.

THE ROOT SYSTEM of WEED PLANTS

Very few realize the great mass of roots that weed
plants develop underground in a few short days.
For instance, it is found that in about one month only
after seeding the roots of the Wild Oat plant and of the Mustard plant
descend about 30 inches into the ground, with a great mass of arms
and branches that tend to smother early wheat plants. Such weeds
consume a great deal of the valuable moisture and plant food that
should be available to the wheat plant. The control of weeds when
they are young, therefore, is one of the best means readily available to
the farmer of increasing his income and profit.

SEARLE GRAIN COMPANY, LIMITED, WINNIPEG

**DON'T BUY IN THE DARK.
SPEND YOUR MONEY FOR
ADVERTISED GOODS.**

THE COST OF PORK PRODUCTION.

How much does it cost to produce a 200-
pound marketable hog? This question has
been asked thousands of times during the
past few years by farmers who want to know
how much they may expect to gain by mark-
eting their grain via the hog route.

The quality of the grain fed, the nature
and quantity of the supplements used, and the
methods of feeding and management all exert
a considerable influence on the grain require-
ment. However, from extensive data secured
at the Domiuon experimental station, at La-
combe, where a great deal of experimental
work on practical hog feeding has been con-
ducted, it would appear that the average grain
required to produce a 200 pound pig in Cen-
tral Alberta is about 900 pounds.

The Lacombe station recommends that the
weanling pig be started off on a meal mixture
of 2 parts of oats and 1 part of barley or
wheat, and that as the feeding period ad-
vances the mixture be gradually changed to 1
part of oats and 3 parts of barley or wheat.
Using this as a basis, approximately two-
thirds of the total grain fed would be barley or
wheat, and one-third oats. Applying these pro-
portions to the grain requirement of 900 lbs.,
one finds that this quantity represents approxi-
mately 12-12 bu. barley or 10 bu. wheat, and
9 bu. oats.

By multiplying these figures by the cur-
rent market prices of the different grains and
adding the resulting products one may arrive
at the approximate cost of the grain required
to feed a market hog up to 200 pounds when
the grain ration is supplemented thruout the
feeding period with the dairy by-products or
ankage.

HOW TO MAKE ICED TEA

Infuse six heaping teaspoons of Salada Black Tea in a pint of fresh boiling water. After six minutes strain liquid into two-quart container. While hot, add 1½ cups of granulated sugar and the juice of 2 lemons. Stir well until sugar is dissolved. Fill container with cold water. Do not allow tea to cool before adding the cold water, otherwise liquid will become cloudy. Serve with chopped ice.

"SALADA" Iced Tea

Short Life-Stories

Now and then the writer who is responsible for this column each week feels impelled, instead of writing an article himself, to pass on something he has read which may prove helpful and encouraging to others. This is one of those times when two or three short stories from real life seem to call for repeating.

There has been a lot of talk, the last few years, about how the worker is exploited under capitalism. Not much has been said about the other side of the picture. Let us tell then of a man, a small manufacturer, who, when the crash came, employed twenty people. His business has shrunk during the depression, but the same twenty are still on his payroll. What is more, he is still paying them the same wages. He has done this by ruthless cutting of his own expense, and by dipping into his own capital. He has carried the people who work for him as a personal responsibility. He doesn't like to talk about it. When questioned, he merely shrugs his shoulders and insists that he has done nothing extraordinary. "It's like horses," he says. "When you put a horse on a hard ride, you see that your mount is fed and watered, don't you? I can't do less for the people who work for me. I can't sleep when I know they aren't sleeping well. That's all there is to it." Such men do more toward making this a better world than a thousand laws, enforced by a million policemen. The Golden Rule is the one code that seems to work.

Real life beats anything the fiction writer can invent. Take the case of another man who would be a branch manager for a big concern. He had an impressive suite of offices, and a number of people working under him. He belonged to the best clubs, drove a big car, and lived well. As the years passed, he grew to take his position for granted. He began to pay more attention to outside interests and less to his job. Times grew hard, but he still took things easily. The home office was troubled. Hints, increasingly broad, seemed to have no effect on him. Finally it was decided that he must be discharged. But the boss, remembering his long years of service, intervened, and, in compromise, he was recalled to the home office. There he was given a desk among the city salesmen. It must have been a hard dose for him to swallow, but he felt humiliated, he did not show it. He never referred to his former grandeur as a branch manager. Always smiling, he was down earlier than any of the cubs; and stayed later. He took what leads were given to him—most of them considered too hopeless for a good man to bother with—and did his best. It was soon forgotten that he had been demoted. He was accepted as just another salesman. No one paid much attention to him. The younger men rather smiled at the zeal of "old" Blank, as they called him. When not on the street, he was always telephoning somebody, or busily thumbing over his prospect list. In the front office, however, a strange thing was noted. Blank's sales began to climb. Customers—big ones—appeared out of the blue, insisting that they must deal with Mr. Blank. The other day, Blank was made General Sales Manager.

It is doubtful if there is any better cure for the weariness of spirit which comes from endless discussion of economics or disputation over such things as politics, than an hour or two with a microscope. For a trifling sum of money, one gains admission to a world full of new and fascinating things. In a single drop of water, scooped from the nearest ditch, there is literally endless entertainment. After a time in this world, with its breathless dramas and life-and-death struggles between incredible creatures, the real world seems curiously remote and unreal. One returns to it refreshed, and with a saner point of view. There is the man whose whole life collapsed in disaster. He saw nothing ahead, and as he stood one night in the bow of the ship which was taking him back to the wreckage of his career, he resolved to throw himself into the dark waves. But he happened to glance up to the great arch of the skies, filled with timeless stars; and suddenly his own life, happy or otherwise, seemed oddly unimportant. He returned to his problems, solved many of them, built a new and successful career upon the ruins of the failure—and, incidentally, became famous as an astronomer.

This is the time of year when young men, just out of school and college, are trying to plan their futures. Many write to friends, asking advice. The advice given by one such friend to a young man was as follows: All I can answer is that if I were just starting out to hunt a career, I'd look for it as far away from the big cities as I possibly could. There is more glamour in city life—perhaps more of what is called "success". The money-making possibilities are greater. But from what I have been able to observe in my journey through this vale of tears, the small-town man gets the most fun out of life. He may earn less, in dollars, than his city cousin does; but his living costs less, and he has more time in which to enjoy the dollars he has. If I had my life to live over, I think I'd start out by heading for a small community, and dig in there. Every now and then I'd visit a big city just to remind myself how smart I'd been to become a small-town fellow.

Expedition To Greenland

British Scientists To Spend Three Months In Arctic

Under the leadership of L. J. Wager, 14 members of the British East Greenland expedition left Aberdeen, Scotland, recently in Sir Ernest Shackleton's exploration ship, The Quest.

They planned to spend three months in the Arctic engaged in scientific work and will explore several mountain peaks which have never before been visited.

The Quest is manned by a crew of Norwegian. Four members of the expedition were accompanied by their wives.

The Hat Went Home

Story From Liverpool Could Be Used By Ripley

An astonishing hat trick was performed by a 77 miles an hour gale on Merseyside. A Bebbington (Birkenhead) man bought a new hat at a Liverpool shop, put it on his head, and carried his old hat in a paper bag. When he reached Bebbington Station the wind lifted his new hat from his head and sent it sailing over the tops of the houses and out of sight. On reaching home he was amazed to find his new hat on the kitchen table. It had dropped in his backyard.

To Promote Highway Safety

Ontario To Cope With Rising Tide Of Automobile Accidents

To cope with the rising tide of deaths from automobile accidents in Ontario, Hon. T. B. McQuesten, minister of highways and acting attorney-general, announced 12 constables had been added to the provincial police force, most of them detailed to the highway traffic patrol.

Provision for additional traffic police marked the latest step in Mr. McQuesten's campaign to promote highway safety. Possession of a driver's license has been made the basis for enforcing the traffic laws, said the minister, and he listed two other features of his safety campaign—police inspection of motor vehicles and equipment and an advertising campaign.

Departmental records showed 202 persons had been killed in automobile accidents during the first six months of this year, compared with 164 in the corresponding period of 1934. The June death toll was 44, an increase of 12 above the May total.

"A small fine does not quite meet the situation," said Mr. McQuesten. "We will get more attention to the law if we exercise freely the cancellation of the driver's license for a term."

Giant Air Cruiser

United States Army Air Corps To Test Out Machine

A giant "flying battle cruiser," claimed the fastest and longest range bombing plane ever built, will be tested soon by the United States Army corps at Wright Field, Dayton, Ohio.

Specifications demanded by the air corps included: A speed of 200 to 250 miles an hour at 10,000 feet altitude, an operating speed of from 170 to 220 miles an hour at the same altitude; endurance—operating speed of from 6 to 10 hours, and a service ceiling of from 20,000 to 25,000 feet.

The aerial battle cruiser has a wing span of approximately 100 feet, length of 70 feet, height of 15 feet, and gross weight of about 15 tons.

Just a Coincidence

Science Of Deduction Came As A Shock To Bus Conductor

A remarkable experience befell Col. Foley when he was traveling along Oxford street in a bus and heard the conductor telling a passenger the names of the shops that originally stood on the site of a large store. Surmising that the man had probably delivered letters there Col. Foley asked him: "How long ago were you a postman?"

"How did you know I was a postman?" the conductor retorted.

"Quite simple, my dear Watson," said the colonel.

The man who had evidently not read his "Sherlock Holmes" neatly fell off the bus. His name, actually was Watson.

New C.P.R. Liner

New Sister Ship For Empress Of Britain Is Projected

Sir Edward Beatty, president of the Canadian Pacific Railway Company, stated before he left for Canada from Southampton recently a sister ship for the Empress of Britain would be built.

"We shall need a new liner of the same type as the Empress of Britain," Sir Edward said, "to give a balanced service."

He added that an order would be placed two years before withdrawal from service of the Empress of Australia and the question of replacing that liner would come up within the next five years.

Substitute For Wool

A process to turn silk into a wool substitute which may free Japan from wool imports is claimed to have been found by Tobei Sakamoto, 38, inventor. He has produced a fibre declared to possess the elasticity, lustre and strength of good grade wool. Use of the process would also raise the price of raw silk, a condition which is largely responsible for the depression in the agricultural communities.

DARLING ONE-PIECE DRESS—REMOVABLE CAPE THAT BUTTONS TO FRONT OF DRESS

By Ellen Worth

Here's a darling little dress—and so unbelievably simple to sew. Well, it could almost be run up before breakfast.

Two ways to make! Smart either way—with or without the removable cape collar.

For playtime you'll probably choose from the very practical cottons as crinkly crepe prints, percale prints, broadcloth, gingham, etc. and trim with contrasting bias bands.

For daintier wear, it is just as pretty as can be of sheer cottons as dimity, batiste, dotted swiss, organdy, etc.

Style No. 524 is designed for sizes 2, 4 and 6 years. Size 4 requires 2 yards of 39-inch material, with 1½ yards of 1-inch ribbon for dress with collar and 1½ yards of 38-inch material for dress without collar.

Patterns 15c each. Address mail orders to: Pattern Department, Win-nipeg Newspaper Union, 17½ McBurney Ave. E., Winnipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day, the price is 15 cents.

The magnetic poles are the points on the earth's surface where the lines of magnetic force are vertical. They are the ends of the axis of the earth's magnetic polarity.

For Prison Reform

Borstal System Is Recommended For Canada

After studying in detail application and operation of the Borstal system in six English prisons, General D. M. Ormond, superintendent of Canadian penitentiaries, has reported to the Dominion government his opinion that similar training and treatment of youthful offenders can and ought to be put into effect in Canada.

Hon. Hugh Guthrie, minister of justice, lauded General Ormond's report in the House of Commons and declared the system may be made effective in Canada within 60 days. No legislation and no extra money vote would be necessary but there would be some staff additions and extra buildings needed.

The Borstal system, forecast for Canada in the speech from the throne at parliament's opening in January, "is a combination of mental, moral, physical and industrial training of a strenuous kind," for convicts under the age of 21 years.

Selected penitentiary inmates under the age of 21 would be housed separately and made the subject of this training with a view to correcting criminal instincts and preparing the youth for more useful effort on discharge.

New Type Radio Sets

France Is Installing Penny-In-The-Slot Machines

Penny-in-the-slot radio sets for the home have been introduced in France. Instead of buying a set, it is possible to have installed free a high-powered set with a small slot machine attached. On putting a franc into the slot 40 minutes' radio programme is assured. This may be either at a stretch or in several short programmes until the 40 minutes are exhausted. A maximum of ten francs may be put in at a time, thus ensuring nearly seven hours of music.

HEALTH MEANS CHARM AND HAPPINESS

Sparkling eyes and smiling lips speak of health and vitality. Clear skin attracts. The healthy, active girl is both happy and popular.

Perhaps you are not really ill yet when the doctor's work is done you are too tired to enter into the good times that other women enjoy. For extra energy, try Lydia E. Pinkham's Vegetable Compound. It tones up your general health. Gives you more pep—more cheer.

Remember that 99 out of 100 women report benefit. Let it help you too!

THE COST OF PORK PRODUCTION.

How much does it cost to produce a 200-pound marketable hog? This question has been asked thousands of times during the past few years by farmers who want to know how much they may expect to gain by marketing their grain via the hog route.

The quality of the grain fed, the nature and quantity of the supplements used, and the methods of feeding and management all exert a considerable influence on the grain requirement. However, from extensive data secured at the Dominion experimental station, at Lacombe, where a great deal of experimental work on practical hog feeding has been conducted, it would appear that the average grain required to produce a 200 pound pig in Central Alberta is about 900 pounds.

The Lacombe station recommends that the weanling pig be started off on a meal mixture of 2 parts of oats and 1 part of barley or wheat, and that as the feeding period advances the mixture be gradually changed to 1 part of oats and 3 parts of barley or wheat. Using this as a basis, approximately two-thirds of the total grain fed would be barley or wheat, and one-third oats. Applying these proportions to the grain requirement of 900 lbs., one finds that this quantity represents approximately 12 1-2 bu. barley or 10 bu. wheat, and 9 bu. oats.

By multiplying these figures by the current market prices of the different grains and adding the resulting products one may arrive at the approximate cost of the grain required to feed a market hog up to 200 pounds when the grain ration is supplemented thruout the feeding period with the dairy by-products or anlage.

The Curling Contest.

The annual contest at the local curling rink between the President's and V. President's teams continues. Much time has been lost of late by the curlers, and all are behind the schedule. All the rock-tossers are now working overtime, to catch up, and we may see an end to the contest early next week. The 2 sides are fairly even, up to the present, and it is still a guess as to which side will be mulcted for the cost of the annual banquet which is held at the close of this competition.

Spruce Grove News.

John Singer, son of Mr and Mrs John Singer, passed away in an Edmonton hospital on Friday, December 27, aged 28 years. He is survived by his parents; 1 brother, Henry; sisters—Mrs. H. Schellenger, Mrs. M. Breda, the Misses Katie, Freda, Clara and Ruth Singer, all of Spruce Grove Dist. A private service was held at the family residence on Sunday afternoon at 1 o'clock, and a service was held later at Peace Lutheran Church, Spruce Grove. Rev. H. Kuning officiated and interment was made in Spruce Grove cemetery.

Postpone Sacred Meet.

The big Social Credit meeting announced for tomorrow Friday, January 3rd, in the City of Calgary, has been indefinitely postponed. Difficulty in securing a suitable meeting place, has been given as the reason.

LOST, 1 purebred Tamworth Sow, wt. 160 to 170 lbs.; all red. Return to Fred Litzenberger, Stony Plain. to

Stony Plain and District.

Miss Marie Gannon returned from Calgary, to participate in the Christmas celebration at her home here.

Mr H. B. Bjork, who had been operating a butcher shop in Stony for several years, has retired from the retail meat business.

The local Public and High schools, which have been closed for the Christmas holidays, re-open tomorrow, the 3d.

A motor truck, while pulling away from in front of a Main street shop on Saturday, was in collision with a car heading north. The car escaped damage, but the truck had one of the fenders badly indented.

Stony was the deserted village Tuesday night. There being no entertainment offered here then, practically all the young people went elsewhere. A contingent followed the S. P. Band up to Onaway, while a much larger bunch left for the City.

BUTTER AND EGGS WANTED at The Royal Cafe.

Prof. Baepfer Leaving.

Prof. W. A. Baepfer, prominent in Lutheran church circles in western Canada for the past 21 years and member of the Concordia College staff in Edmonton since 1923, left Edmonton on Sunday, to take up new duties at the Lutheran theological seminary at Springfield, Ill. The professor is well known here, having preached in St. Matthew's church on several occasions.

Sacred M.P.'s to Meet.

A caucus of Social Credit members of the House of Commons will be held in Edmonton Wed. Jan. 8, according to announcement made by J. H. Blackmore, the leader. Matters of policy will be discussed at the caucus. This caucus will be attended by all 18 of the Alberta members, including Mr. W. F. Kuhl, the member for this Riding. It is expected the 2 Social Credit members from Saskatchewan will attend the meet.

THE ROOT SYSTEM OF WEED PLANTS

Very few realize the great mass of roots that weed
plants develop underground in a few short days.
For instance, it is found that in about one month only
after seeding the roots of the Wild Oat plant and of the Mustard plant
descend about 30 inches into the ground, with a great mass of arms
and branches that tend to smother early wheat plants. Such weeds
consume a great deal of the valuable moisture and plant food that
should be available to the wheat plant. The control of weeds when
they are young, therefore, is one of the best means readily available to
the farmer of increasing his income and profit.

New Lending Library.

The opening of the local book-lending library will come as a pleasant surprise to many—the library to be located in the Mont Bank building. To begin with, a number of volumes on the shelves will not be so great, but they will be augmented later, when literary tastes of the patrons become known. That there has been a demand for such an institution is well known, and now it is about to be established. Books are entertained that the public will see to it the promoters are given every encouragement. Mr. H. Higgins is sponsoring the enterprise.

Also Mr L Kowensky and Mr W E Hayes.

New and second-hand text books for public and high schools on sale at The Sun Book Shop.

The Municipal Election.

Local politicians are already beginning to take an interest in the Stony Plain municipal election. Those members of the Council whose terms are about to expire are Councillors A E Michael, R Breitkreutz, Bill Barth. These all are eligible for re-election. The Mayor's 2-year term also ends shortly, and he also is eligible for re-nomination and it is quite possible his friends may insist on him offering himself as a candidate for the office.

Low Prices on Coarse Grains

Regarding the low prices obtaining for coarse grains at this season, W F Broadstreet, an enterprising farmer of the Winterburn district, has written to say, in a letter to the Edmonton Journal of a recent issue:

You have had many letters in your paper re the low prices for coarse grain, but none of your correspondents have mentioned the effect these low prices will have on next year's wheat acreage.

May I give you one instance, which doubtless could be duplicated many times. Last spring, when extra No. 2 CW barley was around 50c a bu., a certain farmer decided to cut his wheat acreage and grow more coarse grains (which, as you may remember, was the advice being broadcast at that time). He purchased seed for 80 acres at a cost of \$75. With a normal season, he had the expectation of expectation of threshing 2500 or 3000 bu., and if the price stayed fairly steady, of receiving \$1200 to \$1500 for his barley crop. The August frost cut his yield to 1200 bu., threshing machine measure, but as none of the measured bushel he has a bare 1000 bu. by weight, which grades No. 5. The bill for threshing this barley was \$60. At prevailing street prices his barley is worth about \$125, or \$10 less than it took to furnish the seed and thresh the crop. Next year this man, with many others, will have a large increase in his wheat acreage, and perhaps will be guessing wrong again. Yes, during the last 6 years, farming has become a guessing competition, and most of us, unfortunately, guess wrong, because there is no stability in prices, except when they are ridiculously low.

Some solution should be found for such ruinous state of affairs, and a successful solution can only be brought about by Governmental regulation.

First 25 Years the Hardest.

A professor at a Massachusetts college, after intensive investigation, announces that men are naturally better motor car drivers than women, but that the latter improve consistently over a period of 25 years. The trouble is, he would seem to indicate, is that so much can happen in a quarter of a century.

Weak with the Grippe.

Miss Anna Hepko, 1645 98th St. Edmonton, writes—
"I was so weak with the Grippe that it made me quite helpless. A friend told me to try Dr. Martin's Tonic Remedy. And it certainly got me on my feet, and built up my strength. That I wish to let everyone know of this Remedy. How quickly it acts and how reliable it is. Children will take it readily, no mixing or dosing. It contains no Laxatives or Narcotics. A quick acting tonic that builds up your vitality. Dr. Emilie Martin's valuable remedy for Coughs, Colds and La Grippe. Large bottle, price, 75c, at Hayes Drug Store, Stony Plain.

The Hockey Dance.

The opening event of the year, in town, the dance of the Hockeyists last night, drew a good-sized crowd, in spite of the fact that there had been a large number of similar events the previous evening. Barth's orchestra was in evidence, as usual, and everyone seemed to be having a good time. Another of these events will be looked forward to with pleasure.

Card of Thanks.

Mrs Geo Wales and Family wish to thank all their friends for the kindnesses shown them and for the sympathy extended, on the occasion of their recent and bereavement.

Those Savings Certificates.

It has been announced by Hon Chas Cockroft, Provincial Treasurer, that interest payments on provincial savings certificates that fell due for 1935, will be paid as usual. The suspension of payments on these certificates still continues, but the checks for the interest will be issued shortly.

NEW YEAR'S GREETINGS!

As it is impossible to greet personally each and every one of the electors of the Stony Plain Constituency, may I take the opportunity offered by The Stony Plain Sun to extend to you my sincerest wishes for a deeper understanding and a Happier and Prosperous New Year.

This may seem like a mockery in the face of so much suffering, misery and distress around us, but, God willing, I will devote my time and ability, to endeavor with the present Government, to remove this misery and distress and replace it with Peace, Happiness and Prosperity to Every one.

William E. Hayes, M. L. A.

CO-OPERATORS AND PUBLICITY.

Publicity is the light that reveals to all the innermost secrets of society and business. Its function is such that corrupt enterprise shrinks from its effects, while co-operative enterprise seeks its disclosing rays. A co-operative society is instinctively compelled to display in balance sheets and reports, the information which belongs to the people who make business possible. Publicity is a most positive indicator of democratic control.—Ohio Farm Bureau News.

HUMAN VALUES.

Christmas-tide brings home to us the truth that the essential things in human life are unchanging, and that the only true measure of progress and happiness is in human values. Material values are important, but they do not furnish the true measure of the advancement of mankind. If a vast pair of scales could be hung up in the firmament, like the Great Dipper hanging from the North Star, and into one of its pans were filled all the marvels of material development on this globe—all the railways, steamships, automobiles, radios, all the factories and foundries, all the hydro-electric power houses and the other material wonders of our time—they could not begin to out-balance the human values which are the realities of the lives of us all. The joys and sorrows and the other emotions and experiences which we human pilgrims between life and death undergo—hunger and thirst, love and grief and happiness and hope and the facing of death—are the same now as they were thousands of years ago. The real human values are based on the things we all share.
